

# Kitchen Scrub Sponges

These dual-sided, multipurpose Kitchen Scrub Sponges absorb all kinds of spills and soppy messes. The scrubby side loosens gooey grime and tough baked-on spills, and the soft, absorbent microfiber side whisks away the residue.

## limited-edition

Item #: E30528

15.2 cm x 10.2 cm / 6" x 4"

## The problem

There's nothing quite like an absorbent sponge for wiping up spills and cleaning up wet messes. However, most sponges are not the best for removing stubborn, stuck-on dirt and grime.

## Norwex solution

The dual-sided, multipurpose Kitchen Scrub Sponge is your go-to tool for quickly wiping up spills and easily tackling even the most stubborn sticky messes without scratching. The diamond textured microfiber with BacLock® on one side and special scrubby microfiber on the other ensure that kitchen messes are handled quickly and easily – without harmful chemicals!

## Why it's better/safer

- Densely woven, superfine Norwex Microfiber physically removes up to 99% of bacteria from a surface with water alone when following proper care and use instructions
- Traps grime in the cloth and leaves surfaces cleaner, so you won't have to clean as often
- Unlike typical sponges, it's dual-sided:
  - Use one side for scrubbing away stuck-on stains and messes
  - Use the other side containing soft and absorbent Norwex Microfiber for quickly wiping up spills and messes
- BacLock®, our exclusive micro silver agent, protects the cloth by inhibiting odor in the cloth, which means it's ready to use again and again

## What your customers will love

- Can be used repeatedly; use, wash and use again, no need to continually reach for a new sponge or dispose of old ones
- Cleans using only water, so no need for harmful chemicals
- Eliminates residual "chemical muck" left behind by typical cotton cloths and harsh cleaning products
- Great for scrubbing away soap scum, mold and mildew stains, and hard water deposits in the bathroom
- Great for a wide variety of surfaces
- Works to remove burned-on spills from pots and pans; dried-on residue from plates and dishware; sticky spills from refrigerator shelves – and more
- Comes in a set of two, one for your kitchen and one for your bathroom

## How to use

- The soft microfiber side can be used wet or dry to quickly absorb liquid spills and bring surfaces to a high shine
- Dampen first, then use the scrubby side to remove stuck-on, burned-on stains and spills. Use the soft side to wipe down countertops, refrigerator shelves and more.
- When using on easily scratched surfaces such as brushed stainless steel, first test Norwex Microfiber on an inconspicuous spot. *Not for use on anti-glare surfaces.*

(continued on next page)

\*BacLock is an antimicrobial agent solely intended to protect and self-clean the cloth by inhibiting growth of odor-causing bacteria, mold and mildew.

### Caring for microfiber

Wash dirty microfiber with a Norwex laundry detergent and avoid bleach, fabric softeners and dryer sheets. For complete instructions, go to your *Consultant Office > Product Info > Product Instructions > Microfiber Care & Use*.

### Did you know

- According to the United States Department of Agriculture (USDA) washing sponges in the dishwasher kills 99% of the bacteria present on them
